You step on a scale and you see a number. The number tells you what you weigh, but not much else. How much of that number can be attributed to fat? How much is lean mass? The answers to these questions can help determine your diet and exercise strategies.

That’s where the Bod Pod® steps in. Or, rather, here’s where you should step into the Bod Pod. Wear tight-fitting clothing or a swimsuit and take a seat inside for just 40 seconds — the windowed, rounded door closes above you, and you simply breathe.

With your body composition accurately measured, a Canyon Ranch exercise physiologist reviews your results, explains what they mean and helps you set health and wellness goals. You can have a Bod Pod assessment each time you visit the Ranch to help you track your progress.

25 minutes | $120

How do you prepare for the screening?

It’s simple — avoid eating or drinking large amounts of food or liquid an hour prior to testing. Avoid strenuous exercise (sweating) 30 minutes prior to testing.

Wear minimal formfitting clothing — bathing suit or sports bra and tight shorts are ideal.

ASSESSMENTS

DISCOVER YOUR FITNESS AGE
Two-part service  |  $395

How old you are and how old you feel may be two different things. Your fitness age is an indication of how well your body is performing with the passage of time. By learning your fitness age in each of five areas, you’ll discover which areas stand to benefit most from your attention.

Part I (50 minutes) – An exercise physiologist will administer the following tests:

- Body composition to assess fat and lean muscle mass. Please bring tight-fitting clothes or a bathing suit.
- Submaximal exercise test to estimate aerobic fitness level and VO2 max.
- Muscle strength and power testing, including upper and lower body.
- Evaluation of balance.

Part II (50 minutes) – An exercise physiologist reviews your test results with you, and designs a personalized fitness plan to improve your fitness age.

METABOLIC EXERCISE ASSESSMENT
Two-part service  |  $395

Determine your aerobic fitness level (VO2 max) and learn how many calories you really burn when you work out. Recommended if you want to change body composition, learn the most effective way to burn body fat, determine anaerobic threshold, increase stamina and fitness, or improve sports performance.

Part I (50 minutes) – An exercise physiologist administers a submaximal exercise test while you exercise on your choice of indoor cardiovascular exercise equipment: elliptical trainer, rowing machine, stationary bike or treadmill.

Part II (50 minutes) – Your exercise physiologist will explain your results and design an exercise program to maximize your workout and enhance your training program.

EXERCISE & MOTIVATION
Three-part service  |  $345

Have you ever said, “I know what to do, but I just don’t do it”? Explore how your personality promotes or inhibits exercise. This focused, three-part service can help you reach your goals.

Part I (25 minutes) – Complete a short questionnaire outlining your personal fitness preferences.

Part II (50 minutes) – With a lifestyle coach or licensed therapist, review your entire exercise history to identify keys to your past periods of success and vulnerability.

Part III (50 minutes) – Meet with an exercise physiologist to design a customized program that fits. Together, you’ll create a program that balances exercise for health and longevity with activities that suit your personality and lifestyle.

ENHANCED POSTURE
50 minutes  |  $165

Poor posture may contribute to acute or chronic conditions that interfere with an active lifestyle, so it’s important to maintain correct alignment and balance in the way you sit, stand, walk and run. An exercise physiologist will use digital analysis to evaluate your biomechanics and will recommend stretches or strengtheners to help you comfortably perform the activities that mean the most to you.
BODY COMPOSITION SCREENING
25 minutes | $120
With a simple eight-minute test, our Bod Pod® device will accurately measure your body fat percentage and lean body mass. An exercise physiologist will review and explain your results. Scheduling a body composition screening prior to a customized program design service will help clarify your goals for the program. Please bring a tight-fitting bathing suit; for women, tights and sports bra are acceptable (see page 10).

PHYSICAL THERAPY
50 minutes | $220
Learn to use your body more efficiently and comfortably. A physical therapist evaluates your muscle length, strength, posture and alignment. Take home therapeutic exercises to improve functional strength, recover from injury or surgery, reduce chronic pain, or rehabilitate chronic neurological or orthopedic conditions.

AQUATIC THERAPY
Water exercise is an excellent way to improve strength, mobility, endurance and flexibility. Your session with a licensed physical therapist can focus on upper or lower body, trunk/spine, specific areas of weakness, balance, deep-water conditioning (seasonal) or rehabilitation exercise.

BUILD A STRONGER BACK
Learn how to improve the stability of your back and resume normal movement patterns without pain through a series of exercises.

CUSTOMIZED PROGRAM DESIGN

BURDENKO WATER EXERCISE
50 minutes | $165
An innovative water exercise program that helps you improve the six essential qualities of fitness: balance, coordination, flexibility, endurance, speed and strength. No swimming skills are necessary, as you use a floatation vest and water barbells. You can even keep your hair dry. The rehabilitation aspects of the Burdenko method can be used to help recover from injuries or surgery – regaining function is the goal. The conditioning and training aspects are perfect for those interested in improving quality of life and sports performance.

BURDENKO LAND
50 minutes | $165
Learn how to improve the six essentials of fitness: balance, coordination, flexibility, endurance, speed and strength. The Burdenko Method can also help in rehabilitation after injuries or surgery.

EXERCISE FOR WEIGHT LOSS & BODY DEFINITION
50 minutes | $165
Meet with an exercise physiologist for a customized exercise program that will optimize your exercise time, maximize metabolism, increase lean body mass, enhance muscle and promote weight loss.

Rx FOR EXERCISE
50 minutes | $165
Whether you’re looking to kick-start a regular exercise program or you’re already active and want to increase fitness, strength or endurance, our experts can help. An exercise physiologist designs a take-home program based on your goals, interests, time, physical limitations and facilities available. You can focus on areas such as agility and balance, healthy flexibility, advanced training, or women’s health and exercise.

Our integrative team helps you pursue all aspects of health – honoring your individuality and the connection of mind, body and spirit. Get to the heart of what interests you most in an unhurried consultation, then take home a personal plan for wellness.

Cindy Geyer, MD, is board certified in Internal, Integrative and Lifestyle medicine. She partners with you on your path to health, creating an environment where you feel heard and validated. She blends her years of experience in the personalization of diagnostic testing and referrals with your goals and concerns to prioritize recommendations in ways that resonate with you and best support your health and well-being.

It is an exciting time to be involved in integrative and lifestyle medicine, as the ability to perform advanced laboratory testing is growing daily. Yet data out of the context of a person’s unique story, is only data. Let’s connect the dots regarding the impact that lifestyle, environmental exposures and social support can have on your symptoms. Together we will determine the best path for you.

Cory Lenherr, MD uses a holistic and functional medicine approach to help patients uncover the root causes of their health concerns. She seeks to understand a patient’s story, their current environment and social culture as she considers all aspects of their health. Seamlessly integrating her extensive knowledge of traditional and functional medicine with her long-standing interest in mid-body healing, she guides patients toward optimal wellness. Her specialties include digestive wellness and brain health, which are inter-related and connected to everything else in our bodies.

Kevin Murray, ND, LAc, combines the ancient wisdom of Chinese Medicine with the evidence based practices of Naturopathic Medicine. By utilizing both specialized laboratory testing and the diagnostic techniques of a licensed acupuncturist, he works with an individual to discover and treat the cause of their chronic symptoms with diet and lifestyle changes, Chinese and Western herbs, acupuncture and other non-pharmacological tools.

My favorite part about my work is the shared joy with an individual when we are able to make very positive gains in their health with often relatively simple changes.
health, healing & spiritual wellness
Time for the all-healthy, good-for-life Canyon Ranch approach. Science-based and set in motion by you – with positive food, exercise and lifestyle choices. Sustainable choices that make you feel great.

PERSONALIZED MEDICINE

Customize your health care. A thorough evaluation and diagnostic testing will help determine your medical needs and risks. Schedule an appointment with one of our physicians to discuss your concerns and learn more about many standard and innovative diagnostic lab offerings. Lab testing is evolving quickly. Canyon Ranch physicians have expertise in leading-edge blood tests that can provide an in-depth understanding of how your body is functioning, well before the disease process begins. Some examples:

- Your biomarkers and their impact on your health
- Your ability to metabolize toxins in the environment
- Your tendency toward inflammation
- Your adrenal and hormonal function
- Vitamin and mineral levels in your body

OPTIMAL HEALTH CONSULTATION

50 minutes | $395  NEW PRICING

Experience truly modern medicine. Integrating the best conventional and complementary approaches, a Canyon Ranch physician guides you toward optimal health using the insights of both Western and Eastern medicine. Address your overall health and specific concerns, such as cardiovascular risk factors, and get a plan to help you prevent disease and possibly reverse existing conditions. Ask about any issues that concern you. You may receive recommendations for laboratory tests that provide a comprehensive view of your health. A 25-minute consultation is available for follow-up appointments and lab result discussions.
CARDIOMETABOLIC STRESS TEST WITH PULMONARY FUNCTION TESTING
Two-part service | $865
A physician uses advanced testing equipment to determine your aerobic fitness level (VO2 maximum), optimal exercise heart rates, anaerobic threshold and accurate calories burned at any given heart rate. This can also help determine the safety of your participation in exercise: You’ll be screened for arrhythmias, EKG changes, exercise-induced asthma, obstructive lung disorders and blood pressure tolerance during exercise. Whether you’re training for a triathlon or just started to exercise, this service will help you work out safely and efficiently – and get maximum results.

Part I (80 minutes) – A physician uses an EKG and metabolic test equipment to measure your oxygen consumption, carbon dioxide production, and cardiac and lung function during exercise. This test can be performed on a treadmill or bicycle.

Part II (50 minutes) – In a follow-up session, an exercise physiologist will interpret your test and create an exercise prescription to meet your health and fitness goals.

NATUROPATHIC MEDICINE CONSULTATION
50 minutes | $320
Focus on natural ways of preventing illness and addressing chronic health conditions. A comprehensive discussion of your health history, a review of your body’s systems and nontraditional laboratory testing help the naturopathic physician evaluate you from a natural perspective. Food allergies or intolerances, impaired detoxification, nutritional deficiencies and hormonal imbalances are just a few of the problems that may contribute to conditions such as arthritis, asthma, eczema, allergies, fatigue and lingering infections. Your naturopathic physician can prescribrite a treatment plan that may include diet and lifestyle changes, nutritional supplements, herbs, homeopathy and acupuncture. This approach is complementary to traditional treatments.

DEXA BODY COMPOSITION
Two-part service | $405 NEW PRICING
The accurate assessment of body composition will help your physician, nutritionist and exercise physiologist work with you in developing a plan to reach and maintain a healthy body weight. It measures not only total body fat but also lean tissue and visceral fat. Although this test uses radiation, the amount is minimal. The radiation from 135 DEXA body composition measurements are equivalent to that from one chest X-ray.

Part I (25 minutes) – A physician administers the test, interprets your results and advises you about reducing your risk for disease. Note: This test requires removal of metal objects from your person.

Part II (25 minutes) – In a follow-up session, meet with an exercise physiologist who will interpret the test data and help you set realistic goals for muscle mass and body fat levels.

OSTEOPOROSIS PREVENTION & BONE DENSITY EVALUATION
50 minutes | $495
Bone loss (osteopenia or osteoporosis) puts both men and women at risk for spine and hip fractures, a common cause of late-life pain and immobility. Your physician evaluates your bone mineral density using DEXA technology, then explains your results and offers recommendations. For women, this can help in making decisions about hormone replacement therapy, other medications and exercise programs. Younger women at risk for osteoporosis can use these tests results as a baseline in overall health planning. Men at risk, smokers and people over 60 should also consider this service – at-risk individuals receive valuable advice about exercise and calcium replacement.

Note: Can be combined with DEXA Body Composition.
Emerging evidence supports a link between disrupted sleep and risk of heart disease, diabetes, atrial fibrillation, ADHD, cognitive decline and chronic pain. Treating sleep disorders may improve management of these conditions and contribute to better overall health and well-being.

If you are unable to fall asleep, or wake up too early, we recommend a sleep enhancement consultation with a life management expert.

**MEDICAL SLEEP DISORDERS**

**50 minutes | $395 NEW PRICING**

Our physicians will assess the nature of your sleep problems and recommend diagnostic and treatment options. If you have daytime sleepiness, wake up often during the night, wake up tired or if you snore, schedule this consultation early in your stay to allow time for additional testing.

**SLEEP SCREENING**

**Overnight with follow-up | $725 NEW PRICING**

This unmonitored overnight sleep screening test, done in the comfort of your resort room, utilizes an FDA-approved portable sleep device to determine periods of apnea and wake/sleep states by using Peripheral Arterial Tone, a physiological signal that mirrors changes in the autonomic nervous system caused by respiratory disturbances during sleep. A physician will review the results of your sleep screening test with you and make recommendations for treatment.

**MUSCULOSKELETAL HEALTH**

**ADVANCED MUSCLE RECOVERY NEW**

**25 minutes | $109**

Sore, tired, achy muscles at the end of a full day? Visit a certified athletic trainer to experience the ultimate in muscle recovery. Accelerate your down time through use of Normatec pulse compression therapy, Graston Technique soft tissue mobilizations, or assisted stretching to get you ready for tomorrow.

**MEDICAL GAIT & ORTHOTIC ANALYSIS**

**25 minutes | $80**

If you experience discomfort when you walk, visit a Canyon Ranch certified athletic trainer for a complete biomechanical assessment of your feet and legs. This includes a gait analysis and foot scan. Foot Doctor custom orthotics may be recommended as a noninvasive treatment of foot-related problems such as knee, hip and back pain. They also may be helpful in treating bunions, corns, hammertoes, sore arches, plantar fasciitis, sore ankles, shin splints and more.

**MUSCULOSKELETAL & JOINT ASSESSMENT**

**50 minutes | $200**

The easiest injury to treat is the one that is prevented; optimizing your movement gets you there. If you’re experiencing limitations or musculoskeletal pain that disrupts daily living, or you’d like to become more active, meeting with a certified athletic trainer can help. You’ll have a full musculoskeletal evaluation to identify areas of impaired movement, function, mobility or pain. REFLEXOLOGY
50 minutes  |  $170
A treat for your feet with whole-body benefits. A specially trained therapist works on reflex points in the feet that correlate to the individual organs and parts of the body. Activating these reflexes helps improve circulation and promotes relaxation. Please wear comfortable clothing.

SHIATSU
50 minutes  |  $160
80 minutes  |  $250
100 minutes  |  $315
Relax, energize and awaken. Your therapist will use thumbs, fingers and palms to stimulate the body’s energy system, applying pressure to acupoints and along meridians to balance yin and yang. A deeply pleasurable whole-body tune-up. Please wear comfortable clothing.

BINDI-SHIRODHARA
100 minutes  |  $330
Based on traditional principles, this treatment is designed to restore balance to body and mind. Special oils corresponding to your dosha and an herbal masque prepare you for the Shirodhara – warm oil over the third eye and scalp. An Indian balancing bowl is rolled along the soles of your feet, restoring harmony. The powerful combination of herbal infusions, light Ayurvedic massage and energy work cleanses your skin, invigorates your spirit and rejuvenates your energy.

BAREFOOT TABLE THAI
50 minutes  |  $185
Flowing and rhythmic, this treatment is a fusion of traditional Thai stretching and Ashiatsu compression massage techniques. It’s for anyone seeking help with flexibility, training for sporting events, relief from back and hip pain, or deep relaxation. Table Thai revitalizes energy lines to relieve muscular tension and improve range of motion. This massage is performed fully clothed, without oils or creams. Please wear yoga or workout-type clothing.

THAI MASSAGE
100 minutes  |  $335
Thai massage, sometimes called yoga massage, originated in Buddhist monasteries as preventive health care for the monks. Using slow, gentle rocking movements, the therapist applies compression with thumbs, palms, elbows, knees and feet to stretch soft tissues and harmonize vital energies. This graceful therapy, which is given on a futon, leaves you relaxed, energized and more flexible. Please wear comfortable clothing.
ASHIATSU – BAREFOOT MASSAGE  
50 minutes  |  $185  
80 minutes  |  $280  
100 minutes  |  $335  
From the Japanese words “ashi,” meaning foot, and “atsu,” meaning pressure, this is an incredibly relaxing and deep massage therapy. Your therapist uses overhead bars for balance while using foot pressure to release and bring about structural change in chronically sore, tight tissues, and to stimulate circulation.

50 minutes  |  $185  
80 minutes  |  $280  
100 minutes  |  $335  
A restorative treatment developed in Thailand to ease aches and pains of battle-weary warriors. Warm herbal poultices are firmly pressed into muscles to ease every inch of your body. Traditional Thai massage with lemongrass oil, combined with other massage techniques, releases any lingering tension, resulting in a calmed mind and a body.

ENERGY THERAPIES  
CRANIOSACRAL THERAPY  
50 minutes  |  $180  
This soothing treatment adjusts the subtle rhythm of the cerebrospinal fluid as it circulates around the brain and spinal cord. Using very light, sensitive touch, your massage therapist monitors the flow to determine where restrictions are located and gently releases them. This encourages optimal fluid movement throughout the body. The result is a deep sense of calm. Please wear comfortable clothing.

REIKI  
50 minutes  |  $180  
Reiki promotes healing through methods rooted in Eastern spiritual tradition. Your massage therapist gently places his or her hands over your head, chest, abdomen and back, producing a calming effect.
