HEALTH & HEALING HAPPENS HERE

the
DOCTORS are in

How can a doctor’s appointment make your vacation even better?
Our integrative team helps you pursue all aspects of health – honoring your individuality and the connection of mind, body and spirit. Get to the heart of what interests you most in an unhurried consultation, then take home a personal plan for wellness.

Param Dedhia, MD,
is an expert in internal medicine, weight loss, gerontology and sleep medicine. We asked his best advice for a good night’s sleep:

In our 24-7 world, the first step is to prioritize sleep. It’s important to taper into the night – creating a nightly ritual before bed. Lack of sleep can limit physical and mental resilience. A sleep consultation can find answers to long-term concerns.

Diane Downing, MD,
specializes in preventive care, cardiovascular health and integrative medicine. She says her Optimal Health Consultation (page 9), is your chance to talk about whatever’s on your mind:

We could talk about cardiovascular risk and prevention, digestive concerns, sleep and better health. Or you may want to address something specific: Like menopause options, osteoporosis, or how you can reduce risk for breast cancer.

Stephen Brewer, MD,
specializes in family, integrative and preventive medicine. He’s medical director and recently published What Happened to Moderation? He explains why you’d see a doctor on vacation:

This vacation is a chance to treat your mind, your body and your future really well. Our best prescription is always prevention. We do sophisticated early-detection tests here, like an ultrasound that reveals plaque before coronary symptoms show up. Then we offer medical or lifestyle solutions as powerful prevention.

Nicola Finley, MD,
is board-certified in internal medicine and is expert in integrative care and sexuality. If you choose her popular Sexual Health Consultation (page 10), here’s what she says you can expect:

In a comfortable setting, you can share your story, your way. I offer an integrative perspective, and we can talk about any concerns, including low sexual desire, pain with intercourse, difficulty achieving orgasms, using sex toys, and even spirituality. You may find it easier to talk with me than with your physician at home.
Customize your health care. A thorough evaluation and diagnostic testing help determine your medical needs and risks. Canyon Ranch physicians have expertise in leading-edge, quickly evolving lab tests and diagnostic screenings that can provide an in-depth understanding of how your body is functioning, well before the disease process begins. Find out about these factors and more:

- Your biomarkers and their impact on your health
- Your ability to metabolize toxins in the environment
- Your tendency toward inflammation
- Your adrenal and hormonal function
- Vitamin and mineral levels in your body
- Your body composition and bone density
- Your cardiovascular and cerebrovascular risk factors

Experience truly modern medicine. Integrating the best conventional and complementary approaches, a Canyon Ranch physician guides you toward optimal health. Address your overall health and specific concerns, such as cardiovascular risk factors, and get a plan to help you prevent disease and possibly reverse existing conditions. Ask about any issues that concern you. You may receive recommendations for diagnostic and laboratory tests that provide a comprehensive view of your health.

Our registered nurses are here for you! Meet with a nurse educator to discuss how you might address your health goals during this stay. You’ll get expert guidance on the services offered by our integrative health team and receive personalized service recommendations based on your history and long-term goals.
SLEEP MEDICINE
Emerging evidence supports a link between disrupted sleep and risk of heart disease, diabetes, atrial fibrillation, ADHD, cognitive decline and chronic pain. Treating sleep disorders may improve management of these conditions and contribute to better overall health and well-being.

MEDICAL SLEEP DISORDERS
25 minutes/50 minutes | $225/$395
Our physicians assess the nature of your sleep problems and recommend diagnostic and treatment options. If you have daytime sleepiness, wake up often during the night, wake up tired or if you snore, schedule this consultation early in your stay to allow time for additional testing.

The following two services are available after scheduling a Medical Sleep Disorders or Optimal Health Consultation and consulting with one of our physicians.

DEXA BODY COMPOSITION
Two-part service | $475
The accurate assessment of body composition will help your physician, nutritionist and exercise physiologist work with you in developing a plan to reach and maintain a healthy body weight. It measures not only total body fat but lean tissue and visceral fat. Although this test uses radiation, the amount is minimal; the radiation from 135 DEXA body composition measurements are equivalent to that from one chest X-ray.

Part I (25 minutes) – A physician administers the test and advises you about reducing your risk for disease.

Part II (50 minutes) – Meet with an exercise physiologist who interprets the test data and helps you set realistic goals for muscle mass and body fat levels.

OSTEOPOROSIS PREVENTION & BONE DENSITY EVALUATION
Two-part service | $675
Bone loss (osteopenia or osteoporosis) puts both men and women at risk for spine and hip fractures, a common cause of late-life pain and immobility.

Part I (50 minutes) – Your physician evaluates your bone mineral density using DEXA technology, then explains your results and offers recommendations. For women, this can help in making decisions about hormone replacement therapy, other medications and exercise programs. Younger women at risk for osteoporosis can use these test results as a baseline in health planning. Men at risk, smokers and people over 60 should also consider this service – at-risk individuals receive valuable advice about exercise and calcium replacement.

Part II (50 minutes) – An exercise physiologist interprets your test data and helps you design an exercise program to build muscle mass, increase bone density and reduce risk of osteopenia/osteoporosis.

SEXUAL HEALTH CONSULTATIONS
50 minutes | $395
Enhance your sexual function and enjoyment. Choose a private consult in one of the following areas:

Physical Factors – Coping with disabilities, effects of medication and menopause.

Sexual Health for Men and Women – Discuss approaches to help improve your sexual functioning and enjoyment.
MUSCULOSKELETAL HEALTH

ADVANCED MUSCLE RECOVERY  NEW
25 minutes | $95
Sore, tired, achy muscles at the end of a full day? Visit a certified athletic trainer to experience the ultimate in muscle recovery. Accelerate your down time through use of Normatec pulse compression therapy, Graston Technique soft tissue mobilizations, or assisted stretching to get you ready for tomorrow.

MEDICAL GAIT & ORTHOTIC ANALYSIS
25 minutes | $80
If you experience discomfort when you walk, visit a Canyon Ranch certified athletic trainer for a complete biomechanical assessment of your feet and legs. This includes a gait analysis and foot scan. Performance custom orthotics may be recommended as a noninvasive treatment of foot-related problems such as knee, hip and back pain. They also may be helpful in treating bunions, corns, hammertoes, sore arches, plantar fasciitis, sore ankles, shin splints and more.

MUSCULOSKELETAL & JOINT ASSESSMENT
50 minutes | $240
The easiest injury to treat is the one that is prevented; optimizing your movement gets you there. If you’re experiencing limitations or musculoskeletal pain that disrupt daily living, or you’d like to become more active, meeting with a certified athletic trainer can help. You’ll have a full musculoskeletal evaluation to identify areas of impaired movement, function, mobility or pain. In addition, you’ll receive a customized therapeutic exercise program, including home care plans for a return to optimal function and injury prevention.

SHOCKWAVE & LASER THERAPY
25 minutes | Varies
By applying sound waves to an injured site on the body, this treatment can help relieve musculoskeletal pain or injury. The sound therapy breaks up scarring that has penetrated tendons, ligaments and other soft tissues, and reactivates the body’s natural healing process. Laser may be combined with shockwave to enhance the healing effect – it is noninvasive and nonsurgical, with virtually no side effects – or used alone to facilitate healing.

Note: A Musculoskeletal & Joint Assessment is required prior to treatment. Number of Shockwave and/or Laser Therapy sessions varies according to need.

What is an Exercise Physiologist?

An exercise physiologist is a health professional focused on prevention of issues that result from sedentary lifestyle – from heart disease to osteoporosis – and on performance, to help you meet a personal goal, whether it’s finishing a marathon, keeping up with grandkids or just feeling good.

At Canyon Ranch we hire only exercise physiologists with a four-year college degree in anatomy, physiology or biology plus a two-year master’s degree in exercise physiology. They’re experts at conducting and interpreting test results and can create a personalized fitness program for you.
Asessments with an Exercise Physiologist

**FIT3D Body Scanning**

- **25 minutes | $95**

Getting the body changes you’ve been working for? Let’s find out. Stand on a slowly rotating platform while the scanner measures 200+ body sites and creates an accurate three-dimensional image of you. With repeated scans you can track changes in muscle circumferences (arms, thighs, calves, waist, hip) to see if you’ve recovered from an injury or surgery or to assess the effectiveness of your exercise regimen.

**Complete Body Composition and Shape Assessment**

- **50 minutes | $200**

You get triple benefits with this service: a Bod Pod assessment, Fit3D body shape scan and a personalized exercise prescription. The tests provide information such as your ideal healthy weight and whether your current fitness program is resulting in balance and symmetry. An expert helps you create a long-term plan to achieve the body changes you want.

**Body Composition Screening**

- **25 minutes | $95**

With a simple eight-minute test, our Bod Pod® device will accurately measure your body fat and lean body mass percentages. An exercise physiologist will review and explain your results.

*BNote: For the above three assessments, minimal tight-fitting apparel is important for an accurate test. Suggested options: Females: Bathing suit or sports bra and capri leggings; Males: Tight fitting underwear*

**Blood Lactate Threshold**

- **NEW Two-part service | $395**

Get the most out of your exercise. The level of lactic acid in your blood tells you if you’re working over or under your target cardio intensity. This clinical test determines the five training zones that optimize aerobic conditioning, maximize fitness improvement and fat burning and improve exercise performance.

- **Part I (50 minutes)** – You wear a heart rate monitor for this 20- to 30-minute test on your choice of exercise equipment. Your exercise physiologist gradually increases intensity and takes a fingertip blood sample every four minutes.

- **Part II (50 minutes)** – Meet with your exercise physiologist to discuss test results and devise an exercise plan based on your five training zones. Take home a prescription to improve your aerobic stamina, anaerobic threshold, weight loss efficiency and maximum training results.

**Balance Assessment**

- **50 minutes | $195**

Using state-of-the art Biodex equipment, an exercise physiologist assesses your fall risk, balance and proprioception (your sense of where you are in space). You’ll receive a targeted plan to improve balance and mind-body communication.

**Comprehensive Exercise Assessment**

- **NEW Two-part service | $395**

Find out how your fitness level compares with others your age. You can retake these tests over time to see the impact of your exercise program.

- **Part I (50 minutes)** – Physical assessment:
  - Bod Pod® body composition test to measure body fat and fat-free mass
  - Submaximal treadmill test to estimate VO2 max and determine target heart rate
  - Upper body chest-press strength test
  - Lower body leg-press strength test
  - Sit-and-reach flexibility test

- **Part II (50 minutes)** – Your exercise physiologist gives you a full review of all test results and a personalized exercise prescription to meet your goals.

**Telephone Coaching**

- **25–50 minutes**

Follow-up sessions with your exercise physiologist can reinforce your regimen and support your health through exercise. Ask your exercise physiologist for information.
EXERCISE AS MEDICINE  NEW
Two-part service  |  $395

Whether you’re new to exercise or have been recently diagnosed with a chronic condition, you’ll get clear, actionable guidance from a specially trained ACSM-registered clinical exercise physiologist. Learn how to exercise safely and effectively – using minimal equipment – to reach your fitness and health goals.

Part I (50 minutes) – The exercise physiologist thoroughly reviews your exercise and health history. The goal is to customize a fitness routine and care plan that supports cardiovascular risk reduction, symptom management, medication mindfulness, exercise adherence and motivation. Additional services may be recommended for maximum results.

Part II (50 minutes) – In this one-on-one session, your exercise physiologist provides you with the tools and techniques that are most effective and safest for you. You’ll take home practical tools to support your health while working toward your fitness goals.

METABOLIC EXERCISE ASSESSMENT
Two-part service  |  $395

One telling measurement of a person’s health and wellness is the ability to burn oxygen – commonly called aerobic fitness or VO2 maximum. This assessment measures your VO2 max. In addition, we find out the number of calories burned per minute at any heart rate, and learn about your fat versus carbohydrate burning, anaerobic threshold and ideal target rate for fitness improvement and fat burning.

Part I (50 minutes) – You take a metabolic exercise test on your choice of treadmill, bike, elliptical trainer or rowing machine. You wear a mask that analyzes expired breath for accurate measurement of oxygen burn, carbon dioxide produced and more.

Part II (50 minutes) – Your exercise physiologist explains test results concerning your VO2 maximum, calories burned per minute, training heart rates, anaerobic threshold and fat versus carbohydrates burned during exercise. Take home a personalized training prescription.

Recommended for weight loss, fat burning, cardiovascular fitness, or improved biking or running performance.

Note: This service is for apparently healthy people with no signs or symptoms of existing heart disease. Men over 45 and women over 55 should speak with an exercise physiologist about American College of Sports Medicine® guidelines.

MAT: MUSCLE ACTIVATION TECHNIQUE  NEW
50 minutes  |  $200

Based on the Roskopf Principle – “Muscle tightness is secondary to muscle weakness” – MAT therapy is a systematic approach for evaluating and correcting muscular imbalances that contribute to stiffness, injury and pain, tight or weak muscles and compromised movement. Your therapist administers tests to see which muscles are underactive, then helps you make manual corrections. You can see immediate improvement in function and movement – and aim toward long-term relief of muscle tightness and joint pain.

SPA
7 ways to get the most from your massage

1. Give yourself plenty of time before your massage so you can enjoy the steam room, sauna or whirlpool. Warm muscles benefit most from bodywork.

2. A warm shower just before your massage is relaxing and washes away any salts, minerals or chemicals that could clog pores when mixed with massage oils. Then, put on your robe and meet your therapist in the locker room waiting area.

3. Unless the service description specifies that your massage will be received clothed, we recommend that you undress completely and wear a robe to your massage. You will be able to take your robe off and cover yourself in privacy. You will be draped with a sheet throughout the service to preserve modesty. For services that are received clothed, light, loose-fitting clothes are ideal.

4. We use fragrance-free massage oil; lotion is available on request.

5. Communication is the key to getting the massage you want. During your massage, let your therapist know if you feel any discomfort.

6. Because every body is different, our multitalented massage staff is devoted to giving you a massage that satisfies your specific needs. Please communicate with your therapist and listen to your body.

7. Close your eyes and allow your mind and body to enjoy the quiet. Focus on how you feel. Breathe deeply and let tension slip away with each breath. Remember, this time is for you.

We love your natural aroma. Really. And some people are allergic to fragrances. So please refrain from using perfume or cologne in public places.

LAUNDRY & DRY CLEANING
We provide self-service washers, dryers, detergents, bleach and fabric softeners in easy-to-spot locations near the Clubhouse, next to the T-Pool and near Room 509. For laundry and dry-cleaning service, please use the plastic laundry bag in your closet.

CLEAR THE AIR
Smoking cigarettes or vaping is allowed only in designated outdoor, nonpublic areas. Cigars and pipes are not allowed. Smoking in your room will result in a cleaning fine of up to $2,000, excluding any damages.

POOL TIME
Pools are open 6 am to 10 pm daily. No lifeguards are on duty. For your safety, we close the pools when lightning is in the area.

QUIT FOR GOOD
Schedule a complimentary consultation to help set you on the path to quitting smoking. To take advantage of this opportunity, please call Program Advising at Ext. 44338.
